Replit proof of use - TomorrowWorks (team NoMoreTokens)

Screenshots from the team Replit workspace, taken 23 Oct 2026. No secrets shown.

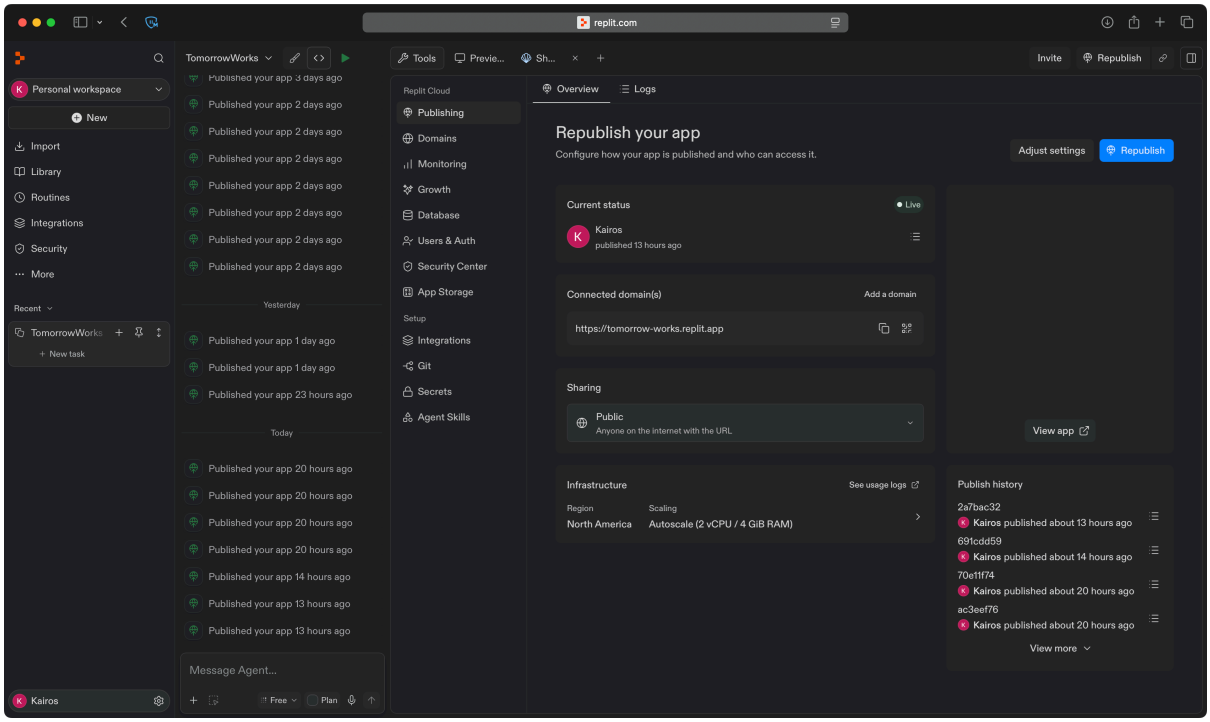

The app is published as an Autoscale deployment (2 vCPU / 4 GiB RAM, 1 machine max) at tomorrow-works.replit.app, and the workspace is connected to the team GitHub repository.

The deployment log shows the app loading 13,939 ESCO skill vectors and reporting RunPod configured and warm.

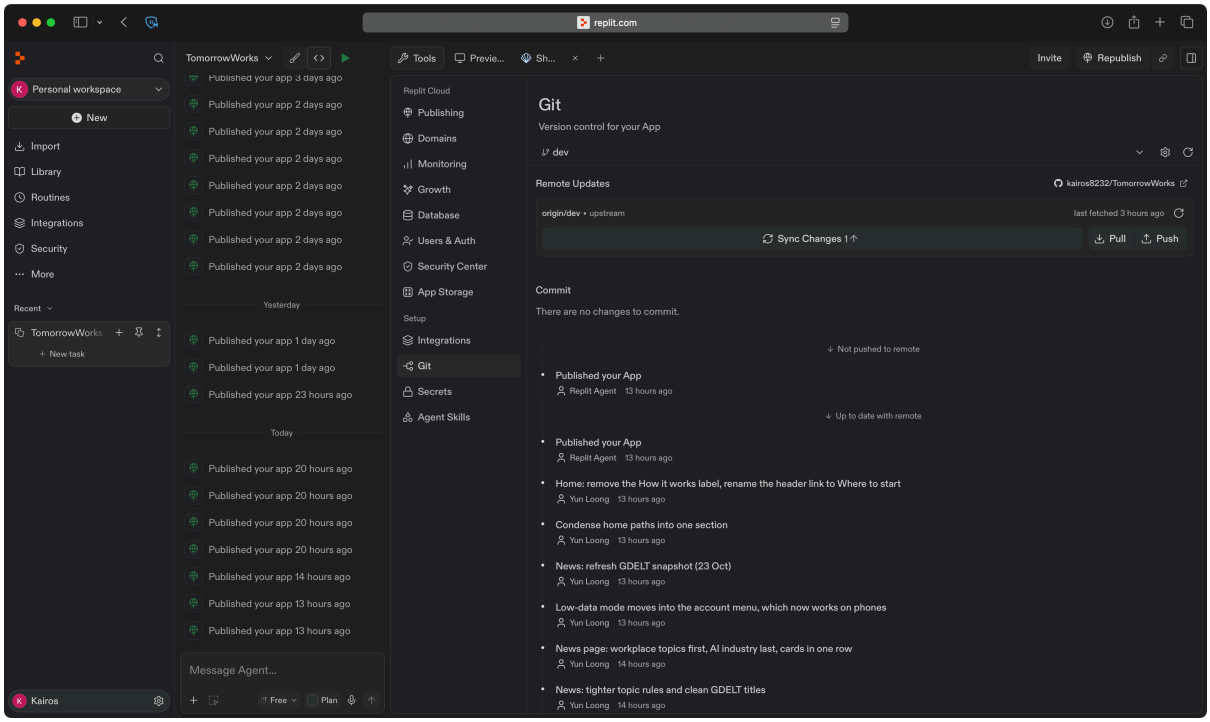

Replit - Usage

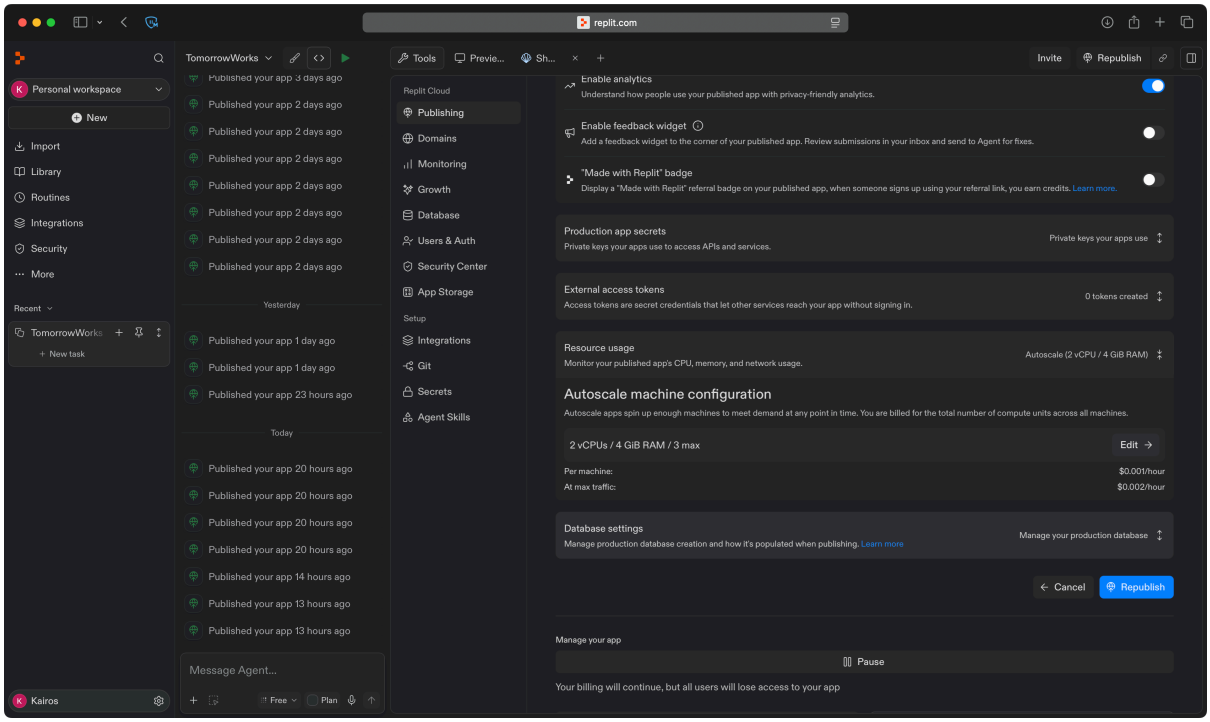

Publishing - app live, connected domain, Autoscale infrastructure, publish history

Git - workspace connected to the team GitHub repository (branch dev)

Publishing - Autoscale machine configuration

Deployment log
